Qarik

Automated Intelligence By Qarik AI

Using open source code and proprietary know-how, tooling, and frameworks, Qarik has developed a GenAI accelerator, Automated Intelligence. Automated Intelligence enables organizations to quickly explore, prove, and utilize the power of GenAI for their specific business in weeks, and scale these capabilities into production in months. Qarik has built a reusable code base leveraging cutting-edge models and tooling to help companies accelerate the value they get from unstructured data in an accurate, scalable, and safe way.

How to get started

Deliverables

— **Accuracy Benchmark**
Aim for 80-95% accuracy with a plan to achieve 95%+

— **Business and Technical ViabilityAssessment of Use Case**
Observations that account for People, Process, andTooling to ensure we are looking at a usecase holistically in preparation for scale

— **Proposed Next Steps**

Timeline 4-6 Weeks

What we need from you

A **C-level** sponsor inside your organization

Client Team you can dedicate to the project

A defined **use case** that can generate significant value

Unstructured Data documents & the ability to access cloud

Our accelerator can prove accuracy viability within in 4-6 weeks

Why **Qarik**

Qarik was founded by Ex-Google Leadership to help enterprises harness the power of technology at scale to service internal and external use cases.

GenAI requires more than just a successful POC. Qarik brings its experience to understand the People, Process, and Tooling to your business use cases to allow you to realize the business value in your investment in GenAI.

The Qarik Approach

Explore

Qarik works hand-in-hand with key stakeholders to craft and execute discovery sessions that will help your organization:

— Understand the use case within your organizational context
— Understand where to start your GenAI journey
— Design key metrics to understand the potential ROI
— Build a roadmap spanning from concept, to pilot, to production and adoption

Expand

Qarik brings expertise in change management and production rollout to build sustainable momentum as users adopt and expand your GenAI solutions, integrate their feedback, and help to make the GenAI platform a success, while continuing to scale your capabilities.

Embed

Qarik teams work shoulder-to-shoulder with your teams to deploy the Automated Intelligence accelerator and start proving your GenAI use cases in your desired environments. Along the way we coach your teams, make recommendations, and implement changes to the system, including security, workflow, automation, etc. Through this process, we are able to not only provide expertise, but also enable your teams to achieve sustainable future growth and success.
